Mr. J. F. White
Asst Sales Manager
Andrew Company
563 East 75th St
Chicago 19
Illinois

Dear Mr. White:

Concerning our discussion the other day at the Grand Central Palace IRE show, I wish you would quote me on 200 ft. of 3 1/8" coaxial line complete with necessary couplings, flanges, elbows, seals and a dehydrating system.

I do not have the installation layout prepared but it will be a normal transmitter station alongside of which will be a 90 ft. self-supporting Blaw-Knox tower mounting a GM 6-bay circular FM antenna. I suggest you figure on the normal number of elbows.

Please quote your best delivery. The installation will be for the Troy Record Company, Troy, N. Y. Please send a copy of your proposal to me and the original to Mr. F. L. York, General Manager of this company.

Yours very truly,

Ernest A. Barbeau
