

March 6, 1947

Dear Mr. Cisler:

I am interested in purchasing a good husky four legged tower (Blaw-Knox preferred) self-supporting, 90 feet high, capable of mounting a GE 6-bay FM circular type "donut" antenna, complete with 300 m/m flasher beacon, obstruction lights, anchor bolts and other necessary accessories.

We have just had a quote from Blaw-Knox for such a tower at \$1700. P.O.B. Schenectady, N.Y. but I believe that there is a possibility of saving some money by purchasing a similar tower from government surplus stock. It was my understanding when I was in Louisville recently that you had towers of this approximate specification lined up.

We want to pay under a thousand dollars for such a tower. In fact, I know of such a tower presently available but its source is questionable and I prefer to deal with responsible people. I can buy this tower for just \$650. plus \$458. for lighting equipment.

Please start looking around immediately. I know you are in touch with many tower situations in the country and it is likely you may be able to pick one up for me that will meet the requirements. Bear in mind that in giving you this lead I am out to save some money for my client. If your price is unattractive we will buy the Blaw-Knox at \$1700. So, please do not offer anything unless you know it is a bargain.

Kindest regards.

Very sincerely,

Mr S A Cisler
