SCHENECTADY 4, NEW YORK

August 11, 1947

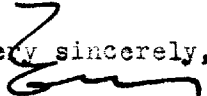

Dear Frank:

Confirming phone conversation, I am going out to the Heldebergs again Wednesday morning with another New York Telephone Company engineer for additional checking of the proposed 15,000 cycle hi-fidelity telephone line I told you about.

This line, if installed and made available to us will eliminate the costly installation of an ST radio relay link connecting your Troy studios and your transmitter at the mountain. I hope to develop complete information very shortly. At this time it looks quite favorable.

La Grange's surveyor promises to get us the property line before the week is out. I'll keep in touch with the situation and advise you as soon as I get the data.

Very sincerely,

Ernest A. Barbeau
Radio Consultant
