Mr. Joseph W. Torlish
Altamont
New York

Dear Mr. Torlish:

Confirming conversation yesterday, please arrange to quote my client, The Troy Record Company, Troy, N.Y., attention of Mr. Frank L. York, General Manager, on a 6" drilled well on Pinnacle Mountain in the Helderbergs on the piece of ground indicated to you. It is my belief that a 6" well will give us all the water we would ever need - if water can be located with your drilling operations.

As explained, WTRY's new FM station just south of General Electric's television station has a new well drilled for an 8" casing. They hit water at about 100 feet so I was recently informed. Your knowledge of this terrain should enable you to be equally as successful with a 6" hole.

I will appreciate having a copy of your quotation to Mr. York.

Thanking you, I am,

Yours very truly,

Ernest A. Barbeau
Radio Consultant
