Gentlemen:

My client, The Troy Record Company, Troy, N.Y., is in the market for a small guyed or self-supporting antenna support to take a General Electric 4-Bay FM circular radiator. Our requirements call for a structure height of 100 ft. over-all including the 42 ft. GE antenna.

Kindly quote on such a structure direct to:

Mr. Frank L. York, Gen. Mgr.,  
The Troy Record Company  
Troy, N.Y.

stating best delivery and marking me for copy of your quotation.

Please include with your bid all necessary erection accessories including necessary guys, anchor bolts, 300 m/m flasher beacon, intermediate obstruction lights and necessary mounting fixtures to take the GE antenna mast deep enough into your structure to assure ample ruggedness and a loading of 20 lbs.

Cordially yours,

Ernest A. Barbeau  
Radio Consultant
